Senior Product Implementation Manager

Jul 2026 – Present

Senior Implementation Manager

Jul 2023 – Jul 2026

Order Protection

Lehi, UT (Remote/Hybrid)

Pipeline & Revenue Impact

- Manage a \$5M+ quarterly implementation pipeline across 50+ concurrent projects, coordinating cross-functional efforts between engineering, sales, customer success, and accounting to accelerate time-to-revenue for a SaaS protection platform.
- Set a company-wide implementation throughput record by preparing and launching \$5M+ in brand revenue within a single quarter, including multiple enterprise accounts valued between \$250K–\$2.4M each.
- Led end-to-end onboarding for 250+ brands — owning technical scoping, platform integration (Shopify, BigCommerce), ERP configuration, stakeholder communication, and production go-live coordination.
- Drove \$1.83M in revenue live within a single sprint cycle, guiding six brands through final QA, preview approval, and deployment under aggressive deadlines.
- Built and launched the full brand onboarding function from zero, clearing a \$2.2M implementation backlog within the first two months on the job.

Technical Problem Solving

- Resolved complex multi-platform checkout integration issues across enterprise storefronts requiring custom JavaScript, Shopify Liquid templating, and Checkout Extensibility expertise — including multi-cart architectures, international order logic, and a variety of edge cases.
- Designed and implemented B2B wholesale filtering solutions to differentiate wholesale and DTC customer experiences within single storefronts, extending the platform's capabilities into a new market segment.
- Diagnosed and resolved hundreds of production-level bugs across live merchant stores — including SKU fulfillment conflicts, widget rendering failures, and third-party app conflicts — minimizing revenue loss and brand disruption.
- Implemented A/B testing frameworks for enterprise clients, configuring opt-in vs. opt-out conversion experiments and resolving conflicts with third-party optimization tools to ensure clean data collection.

Process Design & Leadership

- Created a comprehensive internal knowledge base with step-by-step guides, video walkthroughs, and technical documentation covering standard installs, checkout configurations, and edge-case troubleshooting — reducing new-hire ramp time and standardizing output quality across the team.
- Authored the Implementation PM SOP defining the full project lifecycle from sales handoff through deployment and go-live, establishing repeatable workflows adopted team-wide.
- Developed fulfillment onboarding documentation for ERP and warehouse integration, covering SKU management, auto-fulfillment logic, and digital product handling for brands with complex logistics.

- Designed standardized communication templates for the full onboarding journey, improving brand experience and reducing overall cycle time.

Revenue Recovery & Growth

- Spearheaded billing recovery initiatives, coordinating with accounting to identify and resolve unpaid invoices across accounts with thousands in outstanding balances while preserving positive brand relationships.
- Drove account expansion by converting single-brand implementations into multi-brand portfolios, identifying upsell opportunities within existing accounts.
- Led cross-functional SOP development for enterprise clients with specialized product categories, defining claims handling procedures across brand, CS, and product teams.
- Contributed to hiring strategy, authoring technical role descriptions and defining staffing requirements for implementation positions blending development and e-commerce expertise.

Team Lead, Customer Experience

Apr 2022 – Jun 2023

Route

Lehi, UT

- Led a 12-person support team, achieving record-setting KPIs in customer satisfaction (CSAT) and resolution time across all service channels.
- Created and delivered department-wide training programs and structured weekly 1:1s, improving individual performance metrics and team retention.
- Built and refined internal processes and escalation workflows that improved efficiency and service levels across CX, Product, and Engineering.
- Served as primary liaison between Customer Experience, Product, and Engineering teams to triage, escalate, and resolve technical issues impacting customers.

Customer Experience Specialist

Jun 2021 – Apr 2022

Route

Lehi, UT

- Played a foundational role in building out Route's CX department, authoring SOPs and support policies that remained in use beyond tenure.
- Maintained top-tier individual metrics in response time, CSAT, and resolution quality, consistently ranking among the top performers on the team.
- Promoted to Team Lead within 10 months based on sustained high performance and contributions to team structure and process.

Financial Analyst (Internship)

Feb 2021 – May 2021

Connor Group

- Conducted financial reporting and organizational support for client accounts in a fast-paced consulting environment.
- Assisted in onboarding workflows and data preparation for financial analysis deliverables.
